Ícaro Gabriel Pereira Salgado

Senior Software Engineer | Backend | Java | Spring | Python

São Paulo, SP, Brazil | me@icsalgado.com | linkedin.com/in/icarosalgado

SUMMARY

Senior Backend Software Engineer with 5+ years of experience in Java, Spring and Python, building scalable, highly available distributed systems. At Mercado Libre, Latin America's largest e-commerce company, I work on the core Shopping Cart systems handling **over 1 million requests per minute**. Proven track record migrating monoliths to microservices, optimizing performance (critical endpoint latency cut from **350 ms to 20 ms**) and scaling systems for growth. Data science background that brings a data-driven mindset to technical decisions and business impact.

SKILLS

Languages: Java, Python, SQL
Frameworks: Spring, Spring Boot, Django, Django REST Framework
Architecture: Microservices, distributed systems, REST APIs, monolith decomposition, backoffice tools
Performance & Reliability: High availability, scalability, latency optimization (p95/p99), resilience, error handling, uptime
Data: Data science, predictive modeling, SaaS metrics (churn, cohort, MRR, ARR, LTV)
AI Tools: Claude Code, Codex

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Mercado Libre — Mar 2026 – Present | São Paulo, SP

- Promoted to Senior; continue to own the evolution of core **Shopping Cart** systems serving **1M+ requests per minute**, with direct impact on platform sales.

Software Engineer | Mercado Libre — Mar 2024 – Mar 2026 | São Paulo, SP

- Built and evolved core Shopping Cart services in a business-critical environment, focusing on availability, performance and reliability.
- Delivered features to reactivate inactive customers and drive purchases, producing a significant increase in company and team **GMV** (Gross Merchandise Volume).
- Contributed to a team-wide restructuring targeting uptime, response time and error handling, increasing the resilience of one of the company's most critical systems.

Software Developer | Mercado Libre — Mar 2022 – Mar 2024 | Remote

- Migrated a monolithic system to **microservices**, reducing average, p95 and p99 latency; the most critical endpoint dropped from **350 ms to 20 ms** on average.
- Prepared the infrastructure to handle **3x requests per minute (RPM)**, enabling the feature to roll out to more areas of the app while staying stable.
- Helped build a backoffice system that turned manual tasks into UI-driven workflows, giving product and business teams autonomy and reducing dependence on engineering.

Software Developer | Naia Capital — Apr 2021 – Mar 2022 | Remote

- Developed an internal platform in **Python, Django and Django REST Framework** that generates financial analytics for SaaS companies: churn rate, cohort analysis, MRR, ARR, LTV and other recurring metrics.
- Modeled financial business rules with a focus on robustness, clarity and automated calculations.

Data Science Intern | ETAPA Educacional — Oct 2020 – Apr 2021 | São Paulo, SP

- Built a predictive model estimating scholarship-exam candidates' enrollment probability across discount tiers, focusing sales efforts on the highest-potential prospects.

Programmer (Volunteer) | IEEE Computer Society – Guaratinguetá — Apr 2019 – Apr 2021 | Guaratinguetá, SP

EDUCATION

B.Eng. in Computer Engineering | Univesp — 2022 – 2026

B.Sc. in Information Technology | Univesp — 2022 – 2025

B.Eng. in Materials Engineering | UNESP – São Paulo State University — 2018 – 2022

CERTIFICATIONS | LANGUAGES

Certifications: Google IT Support Professional Certificate | Introduction to Data Science in Python
Languages: Portuguese (Native) | English (Full Professional Proficiency) | Spanish (Full Professional Proficiency)
